

Performance Evaluation

A half-day tactical evaluation designed to reveal how your team truly performs—and how to elevate it

Real Conditions. Real Instructors. Real Insight.

Led by **Israeli Special Forces veterans** and built on **methodologies from elite IDF and law enforcement units**, this session simulates real-world pressure to measure tactical performance, decision-making, and operational readiness.

Scenario-based drills, shaped by years of **special operations experience**, track behavioral responses, technical execution, and safety awareness under stress.

The result: a clear, professional evaluation that exposes blind spots, confirms strengths, and **delivers a focused action plan for improvement**. This isn't off-the-shelf training, **it's the standard by which real readiness is measured.**

Deliverables & Benefits

A high-impact diagnostic experience, designed to measure your team's performance under real pressure and turn insights into action.
